

This blank board can be used with language or articulation skills. After the student practices their target sound for articulation, or completes a language question, they can roll a dice (I use a dice that goes up to 3 to get more practice) or spin a spinner and put that number of chips on the circles on the pumpkin. I used the magnetic chips and magnet wand that comes from Chipper Chat so the winner can be the first to take their magnetized chips off. Regular chips can also be used with the winner receiving an extra sticker.
