

Sink or Float?

This activity can be used with a classroom for children with autism, multiple handicaps, or cognitive disabilities. This can be attached to a teacher's unit for science or for a language lesson on opposites.

The following goals can be addressed through this lesson:

1. Making predictions
2. Taking data
3. Answering questions
4. Labeling common items
5. Opposites (sink/float, heavy/light)

Materials:

Large container of water

Items pictured on list (commonly found at school)
