

Wipeout!!!

For Sentence Production, Grammatical Structures

The goal of the game is to cover (or wipeout) all your pictures by correctly producing sentences or other targets!

This is a set of WIPEOUT games to make sentence production fun! Use bingo chips, m&ms, skittles etc. to cover each picture when the student produces his/her sentence correctly. With mixed target groups, have students cover their pictures as they correctly respond to their target. Students could say WIPEOUT! when all pics are covered.

There are two versions of this game to choose from. One has a pointer/printed slot filler type reminder. The dots provide a tactile reminder for each word in the sentence.

The other version is for students who are ready for production without that guidance.
